Admission Policy

[Master's Degree Program]

The Graduate School of Science and Technology aims to produce first-rate specialized professionals and researchers rich in humanities who understand the laws of nature and principles of mathematics and apply the scientific and technical knowledge derived from this understanding for contribution to the ongoing advancement and happiness of humankind.

We admit ambitious students with a basic education in the fields of natural science and humanities and social science who desire to contribute to the development of science and engineering with the ability to think logically and possess a strong, inquisitive mind.

With the above ideals of desirable students in mind, we administer internal entrance examinations, general entrance examinations, entrance examinations for international students, special entrance examinations for adult students and early admission entrance examinations and make selections of graduate students. Descriptions and levels of knowledge or other qualities that enrollees require are as follows:

- (1) to have the basic academic skills to learn academic frameworks of the field of the program in which they desire to enroll in; and
- (2) to have acquired the communication skills and linguistic ability necessary for research activities.

[Doctoral Degree Program]

The Graduate School of Science and Technology aims to produce independent researchers and first-rate specialized professionals who understand the laws of nature and principles of mathematics and apply the scientific and technical knowledge derived from this understanding for contribution to the ongoing advancement and happiness of humankind.

In light of this aim, we admit students with strong, inquisitive mind to deepen research activities in the specialized field who are highly motivated to identify problems on their own and proactively resolve them. With the above ideals of desirable students in mind, we administer internal entrance examinations, general entrance examinations, entrance examinations for international students and special entrance examinations for adult students and make selections of graduate students.

Descriptions and levels of knowledge or other qualities that enrollees require are as follows:

- (1) to have acquired sufficient academic ability to perform research activities in the specialized field through the education and research in the Master's Degree Program and have the ability to think logically; and
- (2) to have the linguistic abilities and communication skills to present results of research activities at international conferences, symposiums or other related venues as well as to have discussions with domestic and foreign researchers.

Human Resource Development and Other Educational and Research Objectives

[Graduate School of Science and Technology]

In the Graduate School of Science and Technology, we conduct educational and research activities to understand the laws of nature and principles of mathematics and apply them to realize continuous advancement and well-being of humankind, that is, aiming at the fusion of science and technology. The curriculum is therefore designed to offer basic courses while referring to their applications, applied courses while paying attention to their theoretical foundations, and interdisciplinary courses while acknowledging their broader implications. It aims to develop researchers and high-level professionals who are active not only in science and technology, but also in interdisciplinary fields among the social and human sciences, who move with the changing times and seek challenges in new fields, and who possess a well-rounded

character and abilities suited to an international career.

[Architecture and Urbanism Program]

The Architecture and Urbanism Program aims to train capable individuals with an international perspective and who can contribute to the sustainable development of the environment, culture, and human society. These individuals will be responsible for the construction and reinvigoration of a spatial environment with architecture and urbanism at its center. The preconditions for achieving this goal of fostering capable individuals are the establishment of a foundation for education and research that supports innovation, integration, and interdisciplinary understanding based on the solid systems of architecture; training for architecture and urbanism design professionals who can utilize their skills in the international environment; and a redefinition of the arts and of cultural education, which are the bases for creating environments. With these preconditions as the bedrock, this program has developed an architecture course, an international program in architecture and urban design, and a course on places, arts, and consciousness.

(International Program in Architecture and Urban Design)

The International Program in Architecture and Urban Design seeks to foster architecture and urban design professionals who can flourish in the international environment and planners and designers who have the practical capabilities to design and reinvigorate architecture and cities in that environment.

The Master's Degree Program trains highly advanced professionals and researchers who have the necessary knowledge, skills, and linguistic abilities to practice urban and architectural design and work in the international environment. The Doctorate Program takes the specialization that the Master's Degree Program has cultivated in students to a higher level and seeks to produce researchers, educators, and businesspeople who can play a leading role in the international community.

10. Scholarships

Meiji University offer scholarships that are exclusive for international students. Please check the university website for details about the types of financial aids, application criteria, application steps, etc. For any inquiries, please contact the administrative office indicated on the guideline of each scholarship.

Financial Aids: <https://www.meiji.ac.jp/cip/english/admissions/financial.html>

11. Visa

Those who have a status of residence to stay in Japan

Applicants who hold a Student Visa:

Those who already hold a Student Visa may apply for extension of the residence status three months before the expiration of the current visa, however, please be aware that such status may be subject to revocation if you stay more than three months without taking necessary procedures for visa extension.

Applicants staying in Japan other than by a Student Visa:

If you are staying in Japan on a visa other than “Student Visa”, please apply for a change of residence status. The SST Office will be issuing a “Letter of Acceptance (入学許可証 *Nyugakukyokasho*)” during the enrollment procedure, so please use this document to apply for the visa. Please note that those staying in Japan with a Short-stay Visa may be required to leave temporarily, as the change of residence status cannot be made within Japan. Also, those who are enrolled in a Japanese language institution or specialized training college before entering the Graduate School of Meiji University will be required to submit an attendance certificate issued by each institution to the Immigration Bureau when applying for extension.

Those who do not have a status of residence to stay in Japan

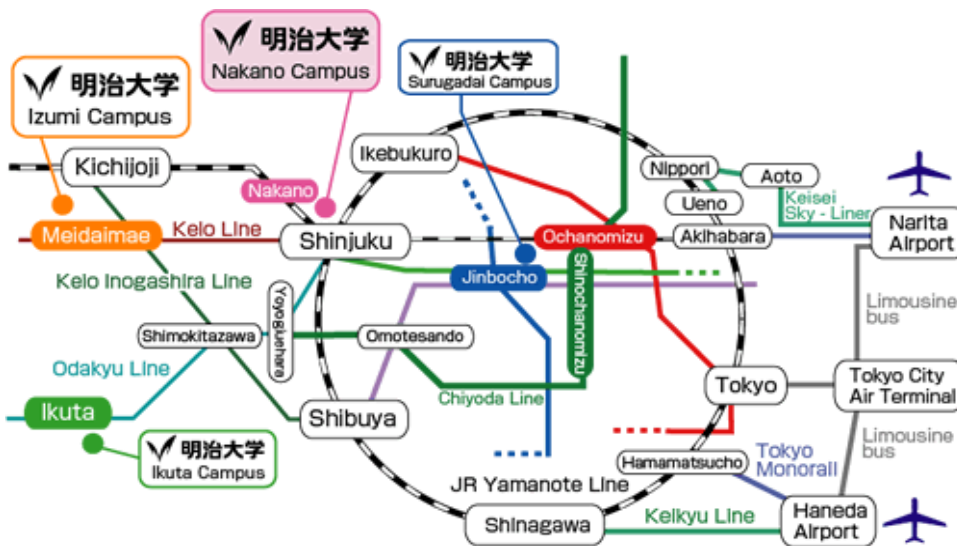

Applicants are required to apply for the Student Visa at the Japanese Embassy or Consulate in your country. For a smooth screening process of visa application, a Certificate of Eligibility (COE) issued by the Tokyo Regional Immigration Bureau will be necessary. Details on application for COE will be sent along with the enrollment documents.

If you have relatives, a financial (scholarship) sponsor in Japan, please request a proxy application for the COE to the Tokyo Regional Immigration Bureau. If you wish that Meiji University makes a proxy application for the COE, submit all the necessary application documents by specific deadline which is much earlier than the enrollment registration deadline. In both aforementioned cases, Meiji University is not responsible for the result of visa issuance, as screenings of visa applications are conducted by the Ministry of Justice. In case the issuance of visa is delayed or the application is denied and you cannot attend the courses in Meiji University, the University shall not assume any responsibility.

12. Privacy Policy

Personal information provided for application and admission to Meiji University will be used only for the purpose of the enrollment examination, notice of results, the enrollment registration and other academic necessities. Part of those operations will be outsourced to companies appointed by Meiji University. Please note that personal information will be handled responsively.
