

Notice for AY2026 Student Health Checkup

All students at Meiji University receive annual health checkups on campus.

A physical checkup can sometimes detect unexpected diseases such as tuberculosis, diabetes, and kidney disease. With this knowledge, we may be able to prevent potential health problems and treat conditions before they worsen. Please check the details and attend the checkup.

After you confirm the checkup results, please consult a doctor if necessary. You can also use the Meiji University Student Health Insurance to receive treatment at affiliated medical institutions during your enrollment. We want to emphasize the importance of taking the annual student health checkup for this reason, too.

Please note that to have a **health checkup certificate** issued by the university, you must take the health checkup.

1. AY2026 schedule and reception

To reduce crowding, each student is assigned a date and time according to their faculty, department, year, class and gender.
