Re-Inventing Japan Project

Creating innovative educational system for sustainable society and urban growth

Curriculum Structure and Exchange Programs of Architecture and Urbanism

Education Area of Meiji University (Architecture and Urbanism) and Partner Institutions

Innovative Educational System for Sustainable Society and Urban Growth
Creation of Innovative Educational System for Sustainable Society and Urban Growth

The purpose is twofold. The "Re-Inventing Japan Project" is designed to train socially engaged professionals who can contribute to solving the issues of sustainable society and urban growth. The project will develop innovative educational systems based on the expertise of faculty members across several disciplines, including architecture, urban planning, and environmental science. These systems will be implemented through various programs for Japanese courses and international exchange programs.

Re-Inventing Japan Project (or the Japan Project) supported by the Ministry of Education, Culture, Sports, Science and Technology

Innovative Educational System for Sustainable Society and Urban Growth

Positive and Negative Experience Japan has contributed to the implementation of Socially Engaged Growth
A practical approach to education program based on design studios and international workshops

The Learning Environment features an integrated curriculum that combines studio-based and design thinking with contextual expertise, providing opportunities for students to learn from experts in various fields. The program is designed to foster a strong cultural exchange and collaboration, which is reflected in the high level of international participation in the workshops. The workshops are led by experienced professionals from around the world, and the students have the opportunity to connect with and learn from these experts in a variety of settings.

The program also includes a research component, which is designed to support students’ academic and professional development. The research component is integrated into the curriculum and is supported by a team of experienced researchers who are dedicated to helping students achieve their full potential.

Overall, the learning environment is designed to provide a rich and diverse learning experience that prepares students for success in the global design industry.
A practical approach to education program based on design studios and international workshops

The I-AUD program offers a variety of courses covering different aspects of design education, including studio-based learning and international workshops. This approach allows students to gain a comprehensive understanding of design principles and techniques, while also providing opportunities to interact with professionals from diverse cultural and disciplinary backgrounds.

Designs for Social Change

Link the World with Architecture

The I-AUD program aims to provide students with a unique learning experience that bridges the gap between local and global perspectives on design. By integrating lessons from diverse cultures and regions, students are encouraged to develop a broader perspective on design and its role in shaping the world.
