### Content

### Working with AI: Ethics, Culture, and Professional Growth

Artificial intelligence is rapidly transforming the way we work.

This lecture examines how AI tools are influencing professional ethics, workplace culture, and human resource development, with a particular focus on European organizational practices and intercultural management in digitalized environments.

#### Key Topics

- Human resource development in European companies
- AI and professional ethics in the workplace
- Intercultural management in digital work environments

### Speaker

### Dr. Ana María Lara Palma

Full Professor, University of Burgos (Spain)

Professor Ana María Lara Palma, Ph.D. (Universidad de Burgos), is Full Professor of Business Management at the University of Burgos. Her publication record includes books and edited proceedings such as Smart Ethics in the Digital World: Proceedings of the ETHICOMP 2024 (co-editor, 2024) and International Education Narratives: Transdisciplinary Educative Innovation Experiences Based on Bilingual Teaching (co-editor, 2022). She also co-edited Paradigm Shifts in ICT Ethics: Proceedings of the ETHICOMP 2020 (2020). Recent papers include studies on emotional design in serious games and e-learning criteria for Ph.D. programs. Her works span ethics, digitalization, education, and organizational development.
