Software installation manual

for VPN connection service

(MacOS)

This manual describes how to install Pulse Secure, the software used for the Meiji University VPN connection service. You only have to install it once.

1. Launch web browser.

2. Open the VPN connection service site.

3. Log in with Meiji University integrated authentication.

	S Pulse Secure			Start			

5. You will be taken to the download screen of the application launcher.

Searching for the application launcher...

If you know that the application launcher is not installed, skip the wait and download now

If you do not want to proceed, please click here to go back.

6. "PulseSecureAppLauncher.msi" will be downloaded. Check the installer when the download is completed. If the download destination is not specified, it will be placed in the download folder.

After the application launcher has completed downloading, follow these installation steps.

Once you have completed the above steps, click <u>HERE</u> to continue with the Pulse Secure launch. We recommend selecting "remember" and "always" during the installation process.

Once the Pulse Secure application is installed and started it will appear in your system tray.

7. Double click the file "PulseSecureAppLauncher.msi" to run it.

8. Click "Continue".
