

Science and Technology in Japan (June 23rd, 2020 - July 2nd, 2020)
Lecturer Profile and Brief Abstract of Lecture & Field Trip

Earthquake Damage and Retrofitting Scheme in Japan, Experiment Lab. Tour	
Date: June 29th	Lecturer: JIN Kiwoong
Abstract of Lecture: In this class, serious earthquake damage and effective retrofitting scheme against the earthquake are introduced. The aims of this course are to understand how the people and structural engineers have been dealt with those earthquake damage, as well as how to build up robust and resilient societies.	
Field Trip: Experiment Laboratory Tour (@Ikuta campus). This experiment laboratory has various loading systems to investigate the seismic performance of building structures against the earthquake.	
	JIN Kiwoong, Senior Assistant Professor of the Department of Architecture, School of Science and Technology since 2018. He received Ph.D. in Engineering from the University of Tokyo.
