Creation of Innovative Educational System for Sustainable Society and Urban Growth

[Outline of the project]

The project is to develop urban visions suited for Asian contexts based on positive and negative experiences Japan has learned from its era of high economic growth and thus to create an innovative educational system through the formation of collaborative programs with 15 partner institutions in the ASEAN and CLMV countries (Kingdom of Cambodia, Lao People's Democratic Republic, Republic of the Union of Myanmar and Socialist Republic of Viet Nam).

The project consists of two phases: collaborating with the partner institutions to develop urban visions suited for Asian contexts through the "Envisioning phase" and conducting Innovative Faculty Development workshops and CLMV Student Conference to organize educational curriculums based on the visions through the "Education phase".

[About the Re-Inventing Japan Project]

The "Re-Inventing Japan Project" is a funding project that aims to foster human resources capable of being globally active and to strengthen the globalization of universities. Assuring the quality of higher education, it aims to support efforts for the formation of collaborative programs with universities in Asia, US and Europe that conduct study abroad programs for Japanese students and strategically accept international students.
